(Followed by refreshments)

For early arrivals, there will be an ice-breaker event the night before starting at 7:00 pm.

The assembly of the future:  
Line-less. Mobile. Autonomous.

The Center XL Assembly operates an industrial community of assembly system operators, equipment suppliers and system integrators who work together on the RWTH Aachen Campus to develop the assembly of the future. An essential part of the community are research partners from the RWTH Aachen Campus network such as the Laboratory for Machine Tools and Production Engineering WZL of RWTH Aachen University and the Fraunhofer Institute for Production Technology IPT. Technologies for assembly are developed, tested and made tangible in practical, agile projects within the community. In addition to consortium research, the center contributes its expertise to bilateral consulting and development projects to design future-proof production systems for its customers.

## Location and Registration

Werkzeugmaschinenlabor WZL der RWTH Aachen  
Steinbachstr. 19  
52074 Aachen, Germany

Participation is free of charge.

The number of participants is limited.

The event is in English.
